No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

US-09-193-562D-28
; Sequence 28, Application US/09193562D
; Patent No. 6309857
; GENERAL INFORMATION:
; APPLICANT: Pauli, Benedicht U.
; TITLE OF INVENTION: Nucleotide Sequences Encoding Mammalian Calcium
; TITLE OF INVENTION: Activated Chloride Channel-Adhesion Molecules
; FILE REFERENCE: 18617.0052
; CURRENT FPLING DATE: 1998-11-17
; PRIOR APPLICATION NUMBER: US/09/193,562D
; PRIOR FILING DATE: 1998-11-17
; PRIOR FILING DATE: 1997-11-17

Degreence 6, Application US/09623624

Patent No. 6576334

GENERAL INFORMATION:

APPLICANT: Magalinin Pharmaceuticals, Inc.

APPLICANT: Magalinin Pharmaceuticals, Inc.

TITLE OF INVENTION: Acthma-Associated Factors as Targets for Treating TITLE OF INVENTION: Acthma-Associated Factors as Targets for Treating TITLE OF INVENTION: Aborders

TITLE OF INVENTION: Aborders

TITLE OF INVENTION: Disorders

TITLE OF INVENTION NUMBER: US/09/623,624

CURRENT FILING DATE: 1990-09-06

PRIOR FILING DATE: 1990-08-23

PRIOR FILING DATE: 1996-08-23

```

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     168,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      9
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         US-09-623-624-1

| Sequence | Application US/09623624
| Patent No. 6576434
| Patent No. 6576434
| GENERAL INFORMATION:
| APPLICANT: Magainin Pharmaceuticals, Inc.
| TITLE OF INVENTION: Asthma-Associated Factors as Targets for Treating
| TITLE OF INVENTION: Asthma-Associated Factors as Targets for Treating
| TITLE OF INVENTION: Disorders
| TITLE OF INVENTION: Disorders
| TITLE OF INVENTION: Disorders
| FILE REFERENCE: 36870-5073-W0
| CURRENT APPLICATION NUMBER: US/09/623,624
| PRIOR FILING DATE: 1999-03-03
| PRIOR FILING DATE: 1999-03-03
| PRIOR APPLICATION NUMBER: US 08/697,360
| PRIOR APPLICATION NUMBER: US 08/697,419
| PRIOR PILING DATE: 1996-08-23
